EDUCATION

University of California, San Diego

Expected June 2027

Bachelor of Science (B.S.), Double Major in Data Science & Business Economics

Relevant Coursework: Machine Learning • Data Structures & Algorithms • Representation Learning • Linear Algebra • Probability & Statistics • Statistical Inference • Econometrics • Business Analytics

PROFESSIONAL EXPERIENCE

Database Engineering & Automation Intern

Incoming

PlayStation – Sony Interactive Entertainment

San Diego, CA

- Incoming intern on the database engineering and automation team supporting large-scale data infrastructure for PlayStation services.

Data Science Intern

September 2025 - Present

Neology P Square

Carlsbad, CA

- Built Python pipelines for large-scale transaction data processing and feature analysis to evaluate OCR confidence scores and environmental factors impacting recognition accuracy.
- Designed SQL workflows in PostgreSQL within an AWS analytics environment to transform toll transaction data and power dashboards for operational monitoring.
- Built a self-service analytics platform that enables clients to generate custom dashboards and automate reporting workflows across operational datasets.

Data Science & Product Management Intern

June 2025 - September 2025

Booz Allen Hamilton

San Diego, CA

- Applied machine learning models (XGBoost, LSTM) to biometric and eye-tracking data for real-time cognitive performance insights.
- Led a cross-functional team across data science, UX, hardware, and full-stack in an 8-week Agile sprint, delivering a top-5 MVP (of 34 teams)
- Improved model accuracy by 50% through iterative tests, feature refinement, & stakeholder feedback.
- Delivered stakeholder presentations translating technical model outcomes into operational impact and ROI.

Machine Learning Research Assistant

October 2024 - June 2025

The Sanford Consortium for Regenerative Medicine

La Jolla, CA

- Developed a computer vision pipeline for segmentation of neurological imaging to support automated analysis of hippocampal structures.
- Implemented Python-based image processing workflows using distance transforms, thresholding, and Meta's Segment Anything Model (SAM).
- Fine-tuned SAM on hippocampal MRI scans to automate ventricle segmentation, reducing manual annotation effort.

Market Research Analyst

August 2022 – April 2024

The Site Supply

Remote

- Analyzed large e-commerce datasets for 11 client companies, generating financial insights for 10K+ consumers in the vinyl resale market.
- Streamlined reporting pipeline, reducing weekly analytics turnaround from three days to one.
- Tested automated purchasing bots for large-scale e-commerce releases, analyzing performance under high-traffic conditions and identifying checkout bottlenecks.

TECHNICAL/SOFT SKILLS

- **Languages & Tools:** Python, SQL (PostgreSQL, MySQL), Java, JavaScript, HTML, R, MATLAB, Microsoft Suite, Excel, AWS suite, Docker, Git, Github
- **Libraries & Frameworks:** Pandas, NumPy, scikit-learn, TensorFlow, PyTorch, OpenCV, Matplotlib
- **Analytics & Data Engineering:** Databricks, Airflow, Tableau, QuickSight, Snowflake, PostgreSQL
- **Product & Workflow:** Agile, JIRA, Confluence, product roadmapping, sprint planning, KPI tracking, stakeholder communication, CI/CD pipeline
